

Terraform Question #100

QUESTION:

You have declared an input variable called environment in your parent module. What must you do to pass the value to a child module in the configuration?

A.

Add `node_count = var.node_count`

B.

Declare the variable in a `terraform.tfvars` file

C.

Declare a `node_count` input variable for child module

Most Voted

D.

Nothing, child modules inherit variables of parent module
