

Terraform Question #169

QUESTION:

As a member of an operations team that uses infrastructure as code (IaC) practices, you are tasked with making a change to an infrastructure stack running in a public cloud.

Which pattern would follow IaC best practices for making a change?

A.

Clone the repository containing your infrastructure code and then run the code

B.

Use the public cloud console to make the change after a database record has been approved

C.

Make the change programmatically via the public cloud CLI

D.

Make the change via the public cloud API endpoint

E.

Submit a pull request and wait for an approved merge of the proposed changes
