

Terraform Question #197

QUESTION:

You have some Terraform code and a variable definitions file named `dev.auto.tfvars` that you tested successfully in the dev environment. You want to deploy the same code in the staging environment with a separate variable definition file and a separate state file.

Which two actions should you perform? (Choose two.)

A.
Copy the existing `terraform.tfstate` file and save it as `staging.terraform.tfstate`

B.
Write a new `staging.auto.tfvars` variable definition file and run Terraform with the `var-file=staging.auto.tfvars` flag

Most Voted

C.
Create a new Terraform workspace for staging

Most Voted

D.
Create a new Terraform provider for staging

E.
Add new Terraform code (*.tf files) for staging in the same directory
