

Terraform Question #207

QUESTION:

While deploying a virtual machine, the first launch user_data script fails due to race condition with another resource deployed during the same Terraform run.

What is the least disruptive method to correct the issue?

A.

Run terraform taint against the virtual machines resource name, then terraform apply

Most Voted

B.

Restart the virtual machine from the cloud portal

C.

Run terraform apply again

D.

Run terraform destroy then terraform apply
