

Terraform Question #256

QUESTION:

You add a new resource to an existing Terraform configuration, but do not update the version constraint in the configuration. The existing and new resources use the same provider. The working directory contains a .terraform-lock.hcl file.

How will Terraform choose which version of the provider to use?

A.

Terraform will use the latest version of the provider for the new resource and the version recorded in the lock file to manage existing resources

B.

Terraform will use the version recorded in your lock file

Most Voted

C.

Terraform will check your state file to determine the provider version to use

D.

Terraform will use the latest version of the provider available at the time you provision your new resource
