

Terraform Question #350

QUESTION:

You are making changes to existing Terraform code to add some new infrastructure. When is the best time to run terraform validate?

A.
Before you run terraform apply, so you can validate your provider credentials.

B.
Before you run terraform plan, so you can validate your code syntax.

C.
After you run terraform apply, so you can validate your infrastructure.

D.
After you run terraform plan, so you can validate that your state file is consistent with your infrastructure.
