

Terraform Question #48

QUESTION:

You have never used Terraform before and would like to test it out using a shared team account for a cloud provider. The shared team account already contains

15 virtual machines (VM). You develop a Terraform configuration containing one VM, perform terraform apply, and see that your VM was created successfully.

What should you do to delete the newly-created VM with Terraform?

A.

The Terraform state file contains all 16 VMs in the team account. Execute terraform destroy and select the newly-created VM.

B.

The Terraform state file only contains the one new VM. Execute terraform destroy.

Most Voted

C.

Delete the Terraform state file and execute Terraform apply.

D.

Delete the VM using the cloud provider console and terraform apply to apply the changes to the Terraform state file.
