

Terraform Question #86

QUESTION:

You just scaled your VM infrastructure and realized you set the count variable to the wrong value. You correct the value and save your change.

What do you do next to make your infrastructure match your configuration?

A.

Run an apply and confirm the planned changes

Most Voted

B.

Inspect your Terraform state because you want to change it

C.

Reinitialize because your configuration has changed

D.

Inspect all Terraform outputs to make sure they are correct
